A few years ago we were fortunate in securing a limited number of seeds of a blue Primula that represented long years of work on the part of an aging English horticulturist. We have worked this into quantity production and are proud to offer it to you for the first time this year. Everyone has wanted a good, straight blue Primula and this is it beyond any question. You'll like it; don't fail to try it.

New Hardy Carnation

SCARLET KING

Carnation Scarlet King

The most important forward step in Hardy Carnations—the valuable progress resulting from the expert effort of experienced Hardy Carnation enthusiasts. It produces uncommonly large, solidly double, vividly scarlet flowers on sturdy stems 12 to 14 inches in length. There is the closest resemblance to quality greenhouse grown Carnations that you can imagine. An outstanding feature is that the 2¼" pot plants set out in proper season bear the first attractive flowers within five to six weeks. Within a short time the entire plant is covered with glowing scarlet flowers suited perfectly to floral work in all arrangements where Carnations are used. Beyond this it is one of the showiest plants in the hardy garden. The plants are exceptionally hardy here in the Great Lakes region; the winters do not seem to set them back; they continue the production of heavy crops of flowers for many years. This is among our foremost recommendations for your perennial planting this spring.

2¼" Pots, Per 10, \$2.50; Per 100, \$20.00

Premium Plant Policy

OUR CUSTOMERS HAVE THIS DEFINITE ASSURANCE

All plants produced and made ready for sale by the Joseph F. Martin Company, whether field grown or out of pots, are without a single exception, finely developed, heavy material, that will give **maximum** results in the first season after planting.

The fact that many items are offered both out of pots and field grown, and some only out of pots or field grown, may be confusing. There is good reason in every instance, and this is borne out by many years of experience in the preparation of perennial plants for our critical customers.

In ALL CASES the best plant for shipping and transplanting is the one that is listed. Where either pot plants or field grown will give good success, both are listed. This is part of the carefully weighed reasoning behind each item in this book.

It's a Fact -

NATURE IS OUR HANDMAIDEN

There is a happy combination of circumstances that helps to make the fine quality perennial plant that you are accustomed to receiving from the Joseph F. Martin Company.

The elements of nature saw fit to jumble themselves some time in the past, and left a peculiar but very advantageous layout of soils that were to become the Martin Nursery properties. Here, where healthy, vigorous perennial plants flourish, we have not one, not a few, but **EIGHT sharply different soil types.**

Those who know Martin plants readily realize what this means to the buyer of perennial material. You know that the plants which you get from this company are developed from the first small stage of propagation in the soil that suits them exactly. The careful testing that is constantly in process here, plus the co-operation of nationally known soil authorities, never fails to find just the right type of soil for the superior development of the perennials that are destined for you. You know, too, that perennials started like this are instilled with a tremendous vigor and terrific vitality that will make them transplant and grow successfully in almost any habitat you give them and with a minimum of care and attention.

**SO, WHY ACCEPT LESS AND PAY MORE
WHEN THE BEST IS WAITING FOR YOU AT
REASONABLE PRICES?**

PLANT THIS SPRING

P. S. In our present circumstances as a nation, everyone has a big job to do! To do a big job, everything must be done in a big way, in order that we pursue our course to an ultimately successful end. As plantsmen, our work is with plants and our part is definitely outlined. As your trade source of supply for hardy plants, let us do our part by being a big part of your effort. We are willing and anxious to work with you and sincerely look forward to serving you this Spring.

What Others Say . .

Throughout the life of our organization we have worked hard to accomplish one particular purpose — the sincere and thorough satisfaction of the customers we serve. That we have done a good job and that it has been appreciated is attested to in the many letters of commendation which we receive. These are gratefully acknowledged, and never forgotten. Our customer's appreciation of our efforts is our incentive, and keeps our vigor and vitality keen edged. In this Spring catalog we're bringing a few excerpts from letters in our files. What better evidence of sincerity and quality is there than **WHAT OTHERS SAY?**

Hardy Chrysanthemums

New in 1941

Leaders Still in '42

These three introductions marked the beginning of our affiliation with the famed Chrysanthemum originator, Mr. Alex Cummings. Their popularity far exceeded the supply and many of our customers were disappointed. This year we have prepared them in great quantities and we will be able to supply your requirements much more closely, as far as we are able to anticipate conditions. 1941 served to definitely prove their merits. Don't fail to put them into your line this spring. You can be sure that they will be among the finest that you have growing.

Mrs. Pierre S. DuPont III

MRS. PIERRE S. DUPONT III

The quality of iridescence is so pronounced in this fine new Hardy Chrysanthemum that accurate description is difficult. The dominant shade is a soft peach tinted with rosy-salmon and fawn shades; the whole overcast with an indescribably luminous sheen. It is entirely distinct and altogether lovely. The large, full, perfectly formed flowers are carried on tall branching stems, making a strong, sturdy, 2½ ft. plant. In full flower in early October, it will prove a grand addition to the garden and an invaluable cut flower variety.

Eugene A. Wander

EUGENE A. WANDER

A big, brilliant, glistening golden yellow beauty, flowering so freely that the stocky growing plant is almost obscured by its branching clusters of big double flowers—each one the height of perfection in form. Plant seldom exceeds eighteen inches and is in full flower by September 20th — therefore valuable where earliness is important. It is a hardy, easily grown variety, requiring no pinching or special handling to produce flowers 4½ to 5 inches across or larger if disbudded. Fine also for pot culture.

2" Pots

Per 10, \$2.50; Per 100, \$20.00

MILKY WAY

This is outstanding among all white Hardy Chrysanthemums. Blossoms are of the semi-double informal type, with broad overlapping petals and are carried in branchy sprays of 5 to 6. Unusually hardy as a plant, the open flower is remarkably frost resistant — a valuable trait where early frosts may injure the opening flower, particularly on white kinds. A strong vigorous plant 2½ to 3 feet in height, flowering in late September.

Hardy enough to overwinter with slight protection anywhere—just what is needed where early frosts destroy the later Mums.

MEET THE NEW CHRYSANTHEMUM FAMILY—THE SPOONS

THE NOVEL *Spoon Family* of Hardy Chrysanthemums

This distinct new race of very recent introduction has grown to a complete and precise array of varieties to cover nicely the popular color range. They're being appreciated more and more for their customer appeal in displays. During the two years of their introduction, their popularity has literally skyrocketed. This year we introduce FIVE NEW VARIETIES to complete the array of colors. It's safe to say that the years coming will see them universally demanded. Stock them now!

It is easily explained by the fact that we have never in the life of this business seen fit to compete for a retail clientele in any manner. Our whole effort has been directed to wholesaling plants of quality to the trade alone—thereby insuring that our complete facilities are always directed toward the production of good things for the tradespeople alone. It is this spirit that has given us life and has fostered our growth. Never are we tempted to withhold anything that is highly meritorious on the grounds that we could capitalize more profitably by taking the cream from the retail market first. **IT IS ALWAYS OUR PURPOSE TO WORK WITH YOU!**

The Victory Garden Program

Government Promotion of Victory Gardening is an Aid to the Merchandising of Hardy Plant Material

It is most timely in times such as these that we who find our livelihood in plants and related products give intense thought to the application of our efforts to the circumstances in which the nation finds itself.

The government has been quick to realize the importance of gardening not only for supplementary food production but for the release of tension and for the tremendous recreational and morale value so necessary to the tired and harassed minds of the public. For this important phase, the logical conclusion is that ornamental gardening is a genuine answer.

AUTHORIZATION

In the fact that the government itself has instituted the "Garden for Victory" campaign by its own initiative, we have the recommendation and the authorization we need to push our products wholeheartedly by the use of the impelling slogan and to campaign for sales under the patriotic "Garden for Victory" banner. We must be cautious, though, and should not use the slogan to over-fortify our material, or use it to indicate a new quality of our merchandise by heralding our plants to be something like "Victory Plants".

HARDY PLANTS FIT THE PROGRAM NEATLY

With the acute shortage of labor, the movement of heavy nursery stock will be sharply restricted. Perennial plant material adapts itself perfectly to the government idea in that amateur gardeners plant and care for the gardens themselves. The size of the plants, the endless arrangements that can be made from the multitude of varieties, the easy culture, and the ultimate beauty that is created are reasons that will easily sell the material. That the garden is hardy, and will bloom fragrantly and abundantly from year to year with ordinary care and without the necessity of replanting is truly tremendous sales appeal. In addition, any area, no matter how small, will accommodate a perennial garden in neat proportion. In this way, the field for sales is broadened to include everyone that has claim to a bit of space, regardless of size.

FLORISTS AND CUT-FLOWER GROWERS HAVE A BIG SUMMER OUTLET

The "Garden for Victory" program will do much more than simply stimulate outside planting. Those who, for lack of ground area, cannot have a garden are going to become acutely conscious of flower products through the national promotion. They won't be left out. While others are enjoying gardens growing and blooming outside, these people will want to bring this beauty into their apartments and closely confined dwellings. This can't fail to bring about a big season for summer cut flowers, or flowering plants in pots. Everyone should be ready, expanding plantings of perennial cut flower material to take care of the increase in demand that is sure to follow the promotion of the gardening spirit nationally. Price and profit will result from flowers of quality — our premium perennials will produce them.

WE ARE READY

The full limit of our facilities and experience are geared to serve you this Spring with great quantities of quality hardy plants. It will be a real privilege to work with you, may we?

Peonies . . .

The fine quality roots which you will receive from the JOSEPH F. MARTIN CO. are not that way by accident. They are groomed with special painstaking care, and are grown for root production ONLY. Consequently, the peak of vitality is maintained and the quality roots which you receive from us will soon provide good profits for you. Plant a good quantity of these carefully selected roots now.

Sweet Violas

Always favorites in the old forms, this list of the improved, good named varieties finds a willing and welcome acceptance among those who use perennial Violas to such good advantage. If we will just stop a moment and think that there is really no one who appreciates plants who does not love the Violet, it is easy to see that they should be a large part of every horticulturist's plant assortment. These varieties listed below have been specially selected for presentation to you because they are the strong growing types and are prolific bloomers of exceptionally good color. They grow ideally out-of-doors in semi-shade. Taken into the greenhouses they produce valuable cut flower crops and also make up most attractively in pots.

Whether or not you've tried Buddleias before, you can't help but be enthusiastic about this dazzling new different one.

For the florist, Royal Red is one of the most useful of all summer flowers — the rich red color is greatly intensified under artificial light and the flowers harmonize well in all floral arrangements.

First production will be limited, so make your reservations now. Your spring planting of the strong 2 1/4" pot plants will give an abundant crop of flowers during their first season. It's new, so you'll have the originality, novelty, and prestige from it that cannot help but result in liberal profit for you.

Royal Purple

Color is a rich glowing purple, such a distinctive shade that it defies good description. Each large panicle seems to be lighted from within, an effect that yards of wordage cannot accurately convey. The bush is completely covered with long, sturdy spikes from July until frost. It attains a height of 4 to 5 feet. Royal Purple is now in its second year of introduction and it has already established itself by our test and by the practical appraisal of our many customers who bought it last year. It is really good, being especially appropriate for use as a florist cut flower item.

Orchid Beauty

A splendid, new variety of soft cattleya-orchid with a brilliant orange eye. It is near the well-known Fortune in color but is twice the plant in any consideration. In our nurseries the flower spikes are easily twice as long and are brilliantly in flower from the very tip to the base at the SAME TIME. Consider a moment its many outstanding traits and you will be sure that no other variety represented as it is, will compare with it. It is an extremely valuable addition to the Buddleia line.

Dubonnet

The color is remarkably similar to the shade of the French Wine, Dubonnet. It is a distinctly different shade of Buddleias. In sunshine and under lights it seems to glow with a reddish cast. The spikes are solid and well rounded and the florets large. Growth is robust and erect, stems are strong. The real beauty of it is the ease with which it harmonizes in floral arrangements with flowers of all shades.

Pink Charming

A strikingly different shade anywhere, flowering from the middle of June until frost. The plant grows to 5 and 6 feet in height and spread. The heads are round and solid and open full length. The flowers are a clear lavender pink, a definitely separate color in the Buddleia range. In the sun they appear clear pink and under the lights a soft pink. It blends particularly with light blue in floral work. No Buddleia planting is complete without a representative quantity of this beautiful pink variety.

Hartwegi

Very similar to Fortune and carries no patent. You may propagate it freely. The large bright lavender panicles harmonize in arrangements with other flowers. A particular point in its favor is the resistance of the flowers to the sun in that they do not burn. The individual florets are closely spaced, imparting a compact and pleasing appearance.

This plant produces five to six inch pure white flowers, bearing two or three rows of deeply lanceolated petals, with a rich golden yellow center. The flowers are distinctly frilled. SNOWBALL

SNOWBALL

This Daisy, without question, ranks with the best of the new introductions. The large, pure white flowers, showing only a small center, have a very close resemblance to the Annual Asters. If the matured flowers are cut, it will encourage a continuous bloom during the entire summer. Because of their size these flowers are very valuable for use as main flowers in baskets or floral pieces; they make up wonderfully well with almost any assortment of flowers. We highly recommend that you include Snowball in your assortment of the up-to-date novelty Daisies.
